

MAD 3200

SNOW PLOUGH

We offer high quality snow ploughs: Front street ploughs, front ploughs in funnel shape, sideploughs. Thanks to the modern design, our snowploughs are economical and effective tools for road maintenance in wintertimes.

The ploughs can be mounted on any suitable truck with DIN plate. The electro-hydraulic unit represents its own drive. The only source of energy needed is the vehicle's 24V on-board network.

The snow ploughs are equipped with side-mounted warning lights and halogen work lights and reflective signs. The driver can easily control from the cab the working angle and the working height of the plow. The effective working hours with lowered plow can be easily read out of the control panel.

Material: steel polyamides

Width: 3000 mm – 3500 mm

Standard width: 3200 mm

Standard weight: 643 kg, adapter plate included

Types of snow ploughs we produce: **MAD 3200PL - MAD 3500PL**
